

lancet::ScxmlStateMachine  
Loader::OpenSubsidiaryFile

lancet::ScxmlStateMachine  
Loader::ParseSubsidiaryDescriptionInfo

lancet::IScxmlStateMachine  
Loader::SetWarningState

```
graph LR; A[lancet::ScxmlStateMachine Loader::OpenSubsidiaryFile] --> C[lancet::IScxmlStateMachine Loader::SetWarningState]; B[lancet::ScxmlStateMachine Loader::ParseSubsidiaryDescriptionInfo] --> C;
```

The diagram illustrates two calls to the `SetWarningState` method of the `IScxmlStateMachine Loader` interface. The first call originates from the `OpenSubsidiaryFile` method of the `ScxmlStateMachine Loader` class. The second call originates from the `ParseSubsidiaryDescriptionInfo` method of the same class. Both calls are represented by blue arrows pointing to the `SetWarningState` method box on the right.
